

How to Create a Document- Based Task

TI version 10.8

APPLICABLE TO:

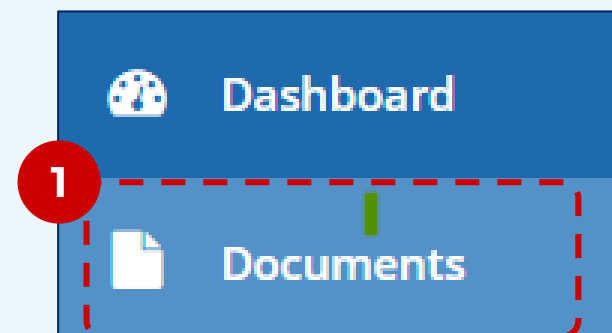

- Admin
- Manager
- Editor
- Reader
- eTMF
- Collaborate
- eISF

Various TI offerings support the creation of Task items, which can be tracked in a dedicated context, to facilitate follow-up on pending jobs or activities within the room.

All users can assign a task to themselves. Assigning a task to users other than oneself is restricted to Admins and users with the Assign Task action enabled in their profile.

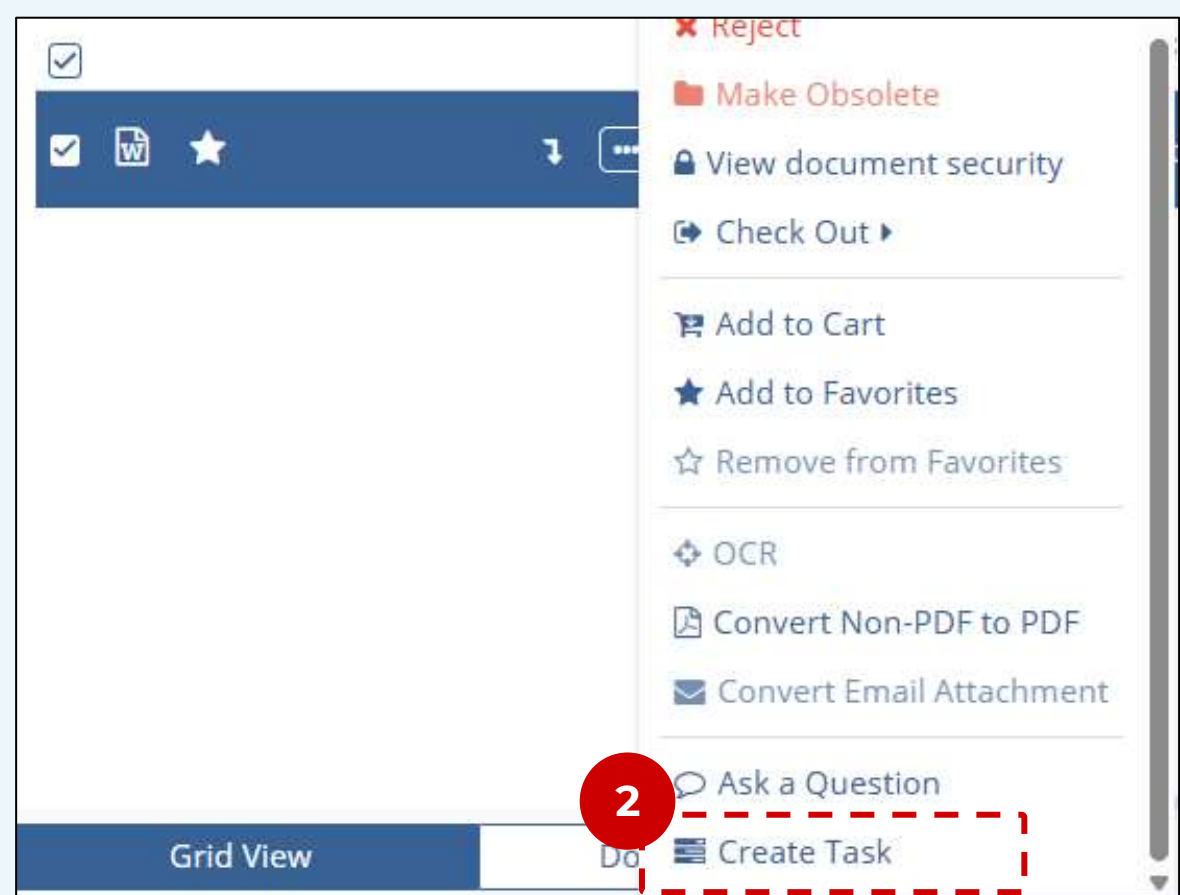

This Job Aid describes only the creation of a task that is attached to a document, as opposed to a stand-alone task, which may refer to any number of things.

- 1** Log into a room and navigate to the **Documents Module**.

- 2** Navigate to a document and expand its Document Actions Menu. Click on **Create Task**.

 The Document Actions menu can be accessed by right-clicking anywhere on a document line, or by clicking on the three-dots icon near the

How to Create a Document- Based Task

3 The task creation menu will allow you to set a task by simply entering someone in the **Assign To** box. Entering a **Subject** to name the task is strongly recommended. A Due Date, Completion status, Category, and Reminder can be optionally added, among other details. User(s) in the **Assign To** field will be deemed responsible for completing the task – they will also be the recipients of the email task reminder if one is set.

4 Click **Save** to finalize. A confirmation message will appear at the top of the active area.
